

This line looks quite elegant (and it is surely not that easy to make the document elegant just based on the data). Maybe it is a good idea to use again before the detailed description(s) or as a vertical line between dates and overview/table?

Methode	Vortrag mit Beispielen und Übungen	Wien	Zürich	
		€1150*	CHF1350*	
		11-12 Sep	11-12 Sep	

Maybe a DISTINCT in the query or are these online trainings? I guess, it will be better to have online and classroom trainings separately (which means we can delete the "delivery type"). There are requests for online trainings but not as many as expected. And as everything is double it looks weird.

The days are still missing in the XML, I guess? But if present, the blank would not be there alone but following a number?

Please create a new style without justification. Without hyphenation it is too ugly.

Can you change the dates having a single-digit number of days in either start or end to dates using training leading 0's? I guess the formatting will look better / less irregular.

Either the icon has to go to the left (but then it is beneath the Comelio/dragon-icon) or the whole title hops to the right.

Good idea to use the snippet as a background image (which it is, I guess?)

 **Übersicht**

Can you try to get this color right? Now, it seems wrong compared to the background and the bg in the H1 header.

It is okay to simply state that the local taxes will apply and skip the star. As it is everywhere, the sentence alone is also understandable without the stars.
